RESULTS

OF

METEOROLOGICAL OBSERVATIONS,

MADE UNDER THE DIRECTION OF THE

UNITED STATES PATENT OFFICE AND THE SMITHSONIAN INSTITUTION,

FROM THE

YEAR 1854 TO 1859, INCLUSIVE,

BEING A REPORT OF THE

COMMISSIONER OF PATENTS

MADE AT

THE FIRST SESSION OF THE THIRTY-SIXTH CONGRESS.

**VOL. I.**

WASHINGTON:  
GOVERNMENT PRINTING OFFICE.  
1861.

20983  
A15  
X-1

IN SENATE OF THE UNITED STATES, April 2, 1860.

*Resolved*, That there be printed, in addition to the usual number, in quarto form, with the plates to illustrate the same, three thousand copies of the Report of the Commissioner of Patents on Meteorological Observations, for the use of the Commissioner of Patents and the Secretary of the Smithsonian Institution.

Attest :

ASBURY DICKINS, *Secretary*.

By W. HICKEY, *Chief Clerk*.

## REPORT.

---

UNITED STATES PATENT OFFICE,  
*January 26, 1860.*

SIR: I have the honor herewith to transmit the results of the Meteorological Observations from the year 1854 to 1859, both inclusive, which have been prepared and condensed at the joint expense of the Patent Office and the Smithsonian Institution. It is believed that these results are of sufficient importance to justify their publication. Indeed, it is due to the scientific men throughout our country, who have voluntarily, and without reward, furnished the data upon which these results are based, that the important information which they contain should be published. The accompanying letter from Professor Henry, Secretary of the Smithsonian Institution, will explain more fully the contents of the papers, and the important advantages which will accrue to the country from their publication.

I respectfully submit the subject to the consideration of Congress for such action as they may deem just and proper.

Very respectfully, your obedient servant,

WM. D. BISHOP,  
*Commissioner.*

HON. JOHN C. BRECKINRIDGE,  
*Vice-President of the United States.*

---

SMITHSONIAN INSTITUTION,  
*Washington, January 25, 1860.*

SIR: I have the honor herewith to transmit to you the manuscript reductions of the Meteorological Observations which have been made, under the direction of this Institution and the Patent Office, by several hundred voluntary observers, in nearly every State and Territory in the Union. The original observations were furnished free of charge by persons interested in the progress of science; but the reductions, which have been attended with great labor, have been made by Professor Coffin, of Lafayette College, at the joint expense of this Institution and the Patent Office.

The results are considered as furnishing very interesting and valuable statistics, not only in regard to the science of meteorology, but to that of agriculture, which will be of increasing importance in determining the climatology of different portions of the country with reference to their special adaptation to the growth of different kinds of crops.

The reductions are those of the observations for six years, viz: 1854, 1855, 1856, 1857, 1858, and 1859, and include the following results:

1. The average height of the barometer.
2. The maximum and minimum elevation of the same instrument, and the day when they occur for each month.

3. The average temperature for the hours of 7 a. m., 2 and 9 p. m., and for the month.
4. The highest and lowest degree of temperature, and when they occurred.
5. The warmest and coldest days as a whole.
6. The average and maximum and minimum force of vapor.
7. The relative humidity.
8. The number of times the wind blew from each quarter.
9. The amount of rain and snow.
10. The average amount of cloudiness.
11. Summaries for each year.

To the reductions are appended the original observations in detail for the periods of the occurrence of several extensive storms, in order to furnish data of importance in studying the peculiar disturbances of the atmosphere to which the North American continent is subjected.

The information contained in these observations having been called for as a portion of agricultural statistics by the Patent Office, and having been furnished gratuitously and with much labor by the persons who have made the contributions, the results ought, in justice to the observers, to be published. Besides this, it is highly important, since meteorology is at this time occupying so much attention, that all the data accumulated in regard to it should be given to the world.

These reductions may be considered as forming a part of the results of a harmonious system now in operation in this country under the War Department, the Patent Office, and the Smithsonian Institution, the objects of which are briefly set forth in the following remarks from the Transactions of the "American Medical Association:" "The primary object of the Smithsonian Institution is the advancement of the science of meteorology and the elucidation of the laws of atmospheric phenomena; that of the Patent Office, to collect facts and deduce therefrom laws which have immediate reference to agriculture; while the system of the Medical Department is intended to be primarily subservient to the health of the troops and the advancement of medical science. These three Institutions are now in harmonious co-operation, and it is believed that it is no exaggeration to say that under their auspices more is now being done to advance meteorology than has ever before been attempted under any government."

It may be proper to add that the War Department has lately published a large quarto volume of similar results from the military posts of the United States army, and that the Smithsonian Institution has now in press, at the expense of its own funds, a sufficient amount of matter to make another of equal size.

I have the honor to be, very respectfully, your obedient servant,

JOSEPH HENRY,

*Secretary of Smithsonian Institution.*

Hon. W. D. BISHOP, *Commissioner of Patents.*

Winds, direction, summary for the year .....	1216

## INTRODUCTION.

---

IN the "Programme of Organization of the Smithsonian Institution," presented to the Board of Regents by the Secretary, December 8, 1847, it was proposed, as a part of the general plan of operations, to establish a system of extended meteorological observations; and all necessary arrangements for securing the co-operation of observers having been completed during the following year, the system went into successful operation on the 1st of January, 1849. More than one hundred registers were received, on an average, monthly during that year, and the number has since increased to over five hundred. The material thus collected is carefully preserved in the archives of the Institution, and has afforded important aid to those who have had occasion to consult it on questions of meteorological science. In regard to many such questions, which depend for their solution on the comparison of simultaneous observations, a reference to the original records is indispensable, mere abstracts being of no value; and, for convenience of such reference, the registers of each month are substantially bound in a volume by themselves, thus forming twelve volumes in each year.

There are other questions, however, relating to the general laws of climate, the influence of local causes, &c., which can be determined more readily by condensed abstracts, and such have been prepared for the years 1854 to 1859, inclusive, and are embodied in Volume I of this work; the leading aim in their preparation being to present, in as succinct a form as possible, all the data afforded by the registers for the investigation of questions of the latter class, taking the observations as reported, and not presuming to sit in judgment upon their accuracy. For this the observers must be alone responsible. Great care has been taken to secure accuracy in the reductions; but it is not impossible that in so large an amount of work errors may have occurred, and if any should be detected by those into whose hands the tables may fall, a favor will be conferred upon the Institution by pointing them out, that a table of errata may be prepared.

The whole is comprised in a series of tables, numbered successively from one to fifty-five, inclusive, for each year.

No. 1 gives the names of the places where the observations were taken, the latitude and longitude of each from Greenwich, and its height above the sea; the number of months in the year through which the observations extend; and the name of the observer.

Nos. 2 to 13, inclusive, are tables of the *barometer* for the several months of the year; showing the mean, the maximum, and the minimum atmospheric pressure, with the day and hour on which the two latter occurred.

Nos. 14 to 25, inclusive, are, in like manner, tables of the *thermometer* (Fahrenheit) and face of the sky, and show the mean temperature of each of the hours of observation, and the mean of these means; the maximum and minimum temperatures, with their dates; the mean temperatures of the warmest and coldest days in the month, with their dates; and the mean cloudiness, in parts of 10.

Nos. 26 to 37, inclusive, show the mean amount of aqueous vapor in the atmosphere, for the several months, at each of the hours of observation, as measured by its equivalent weight in inches of mercury, and the mean and minimum ratio of the same to complete saturation, in parts of 100; also the maximum and minimum amounts of vapor, with the dates on which they were observed.

Nos. 38 to 49, inclusive, show the number of times that the winds, both at the surface of the earth and in the region of the clouds, blew from each of the four cardinal points of the compass and from the intervening quadrants during the several months of the year, and the number of calms. Tables have been prepared for the years 1854, '55, and '56, showing, in a manner similar to the above, the results for each of

the hours of observation; but being found too voluminous to be printed, they are preserved for reference in the archives of the Institution.

No. 50 shows the number of inches of rain and melted snow that fell at each place of observation in each month of the year, and the aggregate for the year. In cases where the depth of snow was not reduced to water, one-tenth of that depth has been assumed as its equivalent in water, and an interrogation mark affixed to the result.

No. 51 is a general summary of the observations on the barometer for the entire year; showing its mean, its maximum, and its minimum height, with the dates of the two latter, and the range for the year.

No. 52 is a corresponding summary of the thermometer and face of the sky; showing, besides the means, maxima, minima, and range, as above, the mean temperature for each of the hours of observation, and the dates and mean temperatures of the warmest and coldest days in the year.

Nos. 53 and 54 are summaries of the psychrometer and winds for the entire year, of the same form as the monthly tables of the same—(Nos. 26 to 37, inclusive, and Nos. 38 to 49, inclusive.)

No. 55 shows the mean velocity of the winds from the several points of the compass, estimated according to the following scale, adopted by the Institution and printed on the blanks that are distributed to the observers:

*Scale by which the force of wind is estimated in figures from 1 to 10.*

1. Very light breeze.....	2 miles per hour.
2. Gentle breeze.....	4 " "
3. Fresh breeze.....	12 " "
4. Strong wind.....	25 " "
5. High wind.....	35 " "
6. Gale.....	45 " "
7. Strong gale.....	60 " "
8. Violent gale.....	75 " "
9. Hurricane.....	90 " "
10. Most violent hurricane.....	100 " "

A more full discussion of the winds has been undertaken by Professor Coffin, and is reserved for a future publication.

The registers, as received from the observers, were sent to Professor Coffin, at Easton, Pennsylvania, and the reductions were made under his supervision.

The work has been carried through the press under the direction of Mr. Wm. Q. Force, of this Institution, who also prepared the General Lists of Stations and Observers, and reduced and incorporated into the tables such observations as were received after the reductions by Professor Coffin were completed.

The observations in detail for the periods of the occurrence of a number of extensive storms, mentioned in the letter to the Commissioner of Patents, form a part of the second volume of this publication.

JOSEPH HENRY,

*Secretary of the Smithsonian Institution.*

## GENERAL LIST OF STATIONS.

XXV

NAME OF STATION.	North latitude.	West longitude from Greenwich.	DATE OF OBSERVATION.	NAME OF OBSERVER.
	° ' "	° ' "		
Union College, N. Y.—(See Schenectady.)				
Union Hill, Texas	30 30	96 31	1857, '58, '59	Dr. W. H. Gantt.
Union Rancho, Cal.	39 30	121 00	1858	William L. Dunkum.
Union Rancho, Cal.	39 30	121 00	1859	James Slaven.
Uniontown, Ala.	32 30	87 33	1859	Rev. R. A. Cobb.
Unionville, Ohio	41 50	81 00	1855, '56	Miss Ardelia Cunningham.
University of Alabama.—(See Tuscaloosa.)				
University of Michigan.—(See Ann Arbor.)				
University of Mississippi.—(See Oxford.)				
University of North Carolina.—(See Chapel Hill.)				
University of the Pacific.—(See Santa Clara.)				
University of Vermont.—(See Burlington.)				
University of Wisconsin.—(See Madison.)				
University Place, Tenn.	35 12	85 48	1859	Charles B. Barney.
Up Park Camp, Jamaica.	17 59	76 56	1855	Col. W. B. Marlow.
Up Park Camp, Jamaica.	17 59	76 56	1856	James G. Sawkins.
Upper Alton, Ill.	38 55	90 10	1854, '55, '56, '57, '58, '59	Dr. John James.
Urbana, Ohio, (Urbana University)	40 06	83 43	1854, '55, '56, '57, '58, '59	Prof. Milo G. Williams.
Utica, N. Y., (Lunatic Asylum).	43 07	75 15	1856, '57	L. A. Tourtellot, M. D.
Vassalborough, Me.	40 27	69 42	1859	James Van Blascow.
Vera Cruz, Mexico.	19 12	96 09	1856, '57, '58, '59	Dr. German Berendt.
Vera Cruz, Mexico.	19 08	96 08	1858	Charles Sartorius.
Vicksburg, Miss.	32 22	90 56	1854	N. Hatch.
Wabashaw, Minn.	44 30	92 15	1857, '58	Rev. Spencer L. Hillier.
Waccamaw, S. C.—(See All Saints.)				
Waldron, Ark.	34 53	94 00	1859	George W. Featherston.
Wales, N. Y.	42 46	78 37	1854	S. O. Carpenter.
Wallingford, Ct.	41 27	72 50	1856, '57, '58, '59	Benjamin F. Harrison.
Walnut Grove, Tenn.	36 00	82 53	1856, '57	James B. Bean.
Wampsville, N. Y.	43 04	75 50	1854, '55, '56, '57, '58, '59	Dr. Stillman Spooner.
Wardensville, Va.—(See Crack Whip.)				
Warren, Me.	44 05	59 15	1859	Calvin Bickford.
Warrenton, Mo.	38 45	91 11	1859	Marion F. Hamaker.
Warrenton, Mo.	38 37	91 16	1859	Miss Mary Alice Tidswell.
Warrenton, N. C.	36 30	78 15	1857	Dr. W. M. Johnston.
Warrington, Fla., (Navy Yard)	30 20	87 16	1854, '55, '56, '57, '58, '59	John Pearson and others.
Warrior's Mark, Pa.	40 39	78 14	1854	J. R. Lowrie.
Warsaw, Ill.	40 20	91 31	1856, '57, '58	Benjamin Whitaker.
Washington, Ark.	33 43	93 37	1859	Nathan D. Smith, M. D.
Washington, D. C., (near)	38 56	76 58	1857	E. G. Arnold.
Washington, D. C.	38 53	77 01	1854, '55, '56, '57, '58, '59	Smithsonian Institution.
Washington, D. C., (near)			1857, '58	J. Weissner.
Washington, Ga.—(See Factory Mills.)				
Washington, Texas	30 26	96 15	1856	W. H. T. Rhodes.
Washington, Texas	30 26	96 15	1856, '57, '58, '59	B. H. Rucker.
Washington College, Md.—(See Chestertown.)				
Waterford, N. Y.	42 48	73 41	1856, '57, '58, '59	John C. House.
Waterloo, Iowa	42 30	92 30	1859	L. H. Doyle.
Watertown, N. Y.	43 56	76 08	1855, '56	Peter O. Williams, M. D.
Waukesha, Wis.	42 50	88 11	1856, '57, '58, '59	Prof. S. A. Bean and L. C. Slye, M. D.
Wausau, Wis.	45 00	89 40	1858, '59	W. A. Gordon, M. D.
Waynesville, Ill.	40 16	89 07	1858, '59	Joshua E. Cantril.
Waynesville, Mo.	37 50	92 07	1859	B. G. Lingow.
Webberville, Texas.	30 14	97 34	1859	E. W. Yellowby.
Welshfield, Ohio	41 23	81 12	1857, '58, '59	B. F. Abell.
Wellsburg, Va.—(See Cross Creek.)				
Wellsville, N. Y.	42 07	78 06	1857, '58	H. M. Sheerar.
West Bedford, Ohio	40 18	82 01	1856, '57	H. D. McCarty.
Wesleyan University, Ct.—(See Middletown.)				
West Concord, N. Y.	42 32	78 52	1856, '57	Lewis Woodward.
West Cornwall, Ct.	41 50	73 21	1854	T. S. Gold.
West Day, N. Y.	43 20	74 16	1858, '59	Jude M. Young.

NAME OF STATION.	North latitude.	West longitude from Greenwich.	DATE OF OBSERVATION.	NAME OF OBSERVER.
West Enfield, N. H.....	43 30	72 00	1856, '57, '58 .....	Nathaniel Purmort.
Western Reserve College, Ohio.—(See Hudson.)				
Westerville, Ohio.....	40 04	83 10	1858, '59.....	Prof. John Haywood.

# ALPHABETICAL LIST OF OBSERVERS

FOR THE

## YEARS 1854 TO 1859.

NAME OF OBSERVER.	DATE OF OBSERVATION.	STATION.	STATE.
Abbe, Cleveland	1859	Lansing	Michigan.
Abell, B. F.	1857, '58, '59	Welshfield	Ohio.
Abell, J. Ralls	1859	Mont View	Virginia.
Abert, Thayer	1859	Warrington	Florida.
Adams, Edward L.	1859	Boston	Massachusetts.
Adams, Irah B.	1854	Lowville	New York.
Adams, J. W.	1859	Portland	Maine.
Alba, Dr. E. M.	1854, '55, '56, '57, '58	Angelica	New York.
Alcott, William P.	1859	Williamstown	Massachusetts.
Aldrich, Verry	1859	Tiskilwa	Illinois
Alexander, Jas. M.	1859	Spencertown	New York.
Alison, Dr. H. L.	1856, '57, '58, '59	Carlisle	Alabama.
Allen, Edwin	1859	New Brunswick	New Jersey.
Allen, James	1857, '58, '59	Port Huron	Michigan.
Allen, Prof. E. H.	1854	Troy	New York.
Allen, Prof. Geo. N.	1857	Oberlin	Ohio.
Allen, W. D.	1854	Buttalo	New York.
Allin, Lucius C.	1854, '55, '56	Springfield	Massachusetts.
Allis, M. H.	1859	Gonzales	Texas.
Allison, Jesse	1859	Bloomington	Illinois.
Alsep, Samuel	1857, '58, '59	Westtown	Pennsylvania.
Ammen, J.	1857, '58, '59	Ripley	Ohio.
Anderson, Dr. C. L.	1854	St. Anthony's Falls	Minnesota.
Anderson, Dr. James.	1854, '55, '56, '57	The Rock	Georgia.
	1859	Thomaston	Georgia.
Anderson, H. H.	1859	Rockville	Indiana.
Andrews, Dr. Seth L.	1856, '57	Romeo	Michigan.
Andrews, Prof. J. W.	1854, '55	Marietta	Ohio.
Anthony, Newton	1857, '58, '59	Mount Union	Ohio.
Arden, Thomas B.	1854, '55, '56, '57, '58, '59	Beverly	New York.
Armstrong, S.	1859	Pardeeville	Wisconsin.
Arnold, E. G.	1856	Acquidnesset	Rhode Island.
	1857	Near Washington	Dist. of Columbia.
Arnold, James B.	1857	Shelby Bay	Bermuda.
Arnold, Mrs. J. T.	1856, '57, '58, '59	Zebulon	Georgia.
Astrop, R. F.	1854, '55, '56, '57, '58, '59	Crichton's Store	Virginia.
Atkins, Rev. L. S.	1857, '58, '59	Madison	Ohio.
Atkinson, G. H.	1857, '58, '59	Oregon City	Oregon.
Atwood, Isaac	1859	Lake Mills	Wisconsin.
Aubier, Prof. John	1858, '59	Fordham	New York.
Austin, W. W.	1854, '58, '59	Richmond	Indiana.
Ayres, Dr. W. O.	1856, '57, '58, '59	San Francisco	California.
Babcock, Andrew J.	1857, '58, '59	Aurora	Illinois.
Babcock, E.	1856, '57, '58, '59	Riley	Illinois.
Bacon, E. E.	1859	Willow Creek	Illinois.
Bacon, William	1854, '55, '56, '57, '58, '59	Richmond	Massachusetts.
Baer, Miss Harriott M.	1854, '55, '56, '57, '58, '59	Sykesville	Maryland.
Bailey, James B.	1856, '57, '58, '59	Gainesville	Florida.
Bailey, S. S.	1859	Dundee	Missouri.
Baird, John H.	1856, '57, '58, '59	Tarentum	Pennsylvania.
Baker, Frank	1857, '58	South Pass	Illinois.
Baker, J. C.	1856, '57, '58, '59	Stanbridge	Canada.
Baker, Miss Mary E.	1854, '55	Ceresco	Wisconsin.
Baldwin, Dr. A. S.	1854, '55, '56, '57, '58, '59	Jacksonville	Florida.
Ball, Dr. J. E., and Mrs. Ida E.	1854, '55	Keokuk	Iowa.

NAME OF OBSERVER.	DATE OF OBSERVATION.	STATION.	STATE.
Ballou, Dr. N. E.	1858, '59	Sandwich	Illinois.
Barbage, Joshua C.	1859	Hardinsburg	Kentucky.
Barber, Prof. G. M.	1855	Berea	Ohio.
Barclay, Dr. R. G.	1858, '59	Jerusalem	Palestine.
Barker, Thomas M.	1857	Ashville	Alabama.
Barlow, Dennis	1859	Arkadelphia	Arkansas.
Barnes, Charles	1854, '55, '58	Madison	Indiana.
Barnes, Dr.	1856, '57	New Albany	Indiana.
Barney, Charles B.	1859	Fort Vancouver	Oregon.
Barrett, James	1859	University Place	Tennessee.
Barrows, Dr. George B.	1858, '59	Linden	Pennsylvania.

REDUCTIONS

OF

METEOROLOGICAL OBSERVATIONS

FOR THE YEAR 1854.

---

# NO. 1.—LIST OF STATIONS AND OBSERVERS, 1854.\*

NAME OF STATION.	North latitude.	West longitude from Greenwich.	Height above the sea.	No. of months observed.	NAME OF OBSERVER.
	° ' "	° ' "	Fed		
Aiken, S. C.....	33 32	81 34	565	8	H. W. Rivenel.
Albion Mines, Nova Scotia.....	45 34	62 42	128	3	Henry Poole.
Alexandria, Va.....	38 48	77 01	56	12	Benj. Hallowell and others.
All Saints, S. C.....	31 40	79 17	20	2	Rev. A. Glennie.
Amherst, Mass.....	42 22	72 34	267	12	Prof. E. S. Snell.
Angelica, N. Y.....	42 15	78 01	1,500	8	Dr. E. M. Alba.
Ann Arbor, Mich.....	42 15	83 30	—	12	L. Woodruff.
Ann Arbor, Mich.....	42 16	83 44	891	12	Prof. A. Winchell.
Ashland, Va.....	38 38	81 57	—	12	Prof. Geo. R. Rossiter and Sam'l Couch.
Assumption, Paraguay, S. A.....	25 16 S	57 45	—	6	E. A. Hopkins, United States Consul.
Athens, Ill.....	39 52	89 56	—	12	Joel Hall.
Augusta Ill.....	40 12	90 45	—	12	Dr. S. B. Mead.
Augusta, Ga.....	33 28	81 54	—	7	W. Haines.
Austin, Texas.....	30 20	97 46	—	12	Dr. S. K. Jennings.
Baldwinsville, N. Y.....	43 04	76 41	—	12	John Bowman.
Ballardsville, Ky.....	38 24	85 31	—	10	Dr. John Swain.
Barbacoas, New Grenada, S. A.....	8 30	79 00	55	1	E. L. Berthoud.
Batavia, Ill.....	41 48	88 23	—	8	Prof. Wm. Coffin.
Battle Creek, Mich.....	42 20	85 01	—	12	Dr. W. M. Campbell.
Beaver Brook, N. Y.....	41 20?	74 50?	700?	10	C. S. Woodard.
Bedford, Pa.....	40 01	78 30	—	11	Samuel Brown.
Beilefontaine, Wis.....	43 40	89 15	—	8	Thomas Gay.
Beloit, Wis.....	42 30	89 04	750	12	Prof. S. K. Lathrop, Prof. W. Porter, and others.
Beverly, N. Y.....	41 23	74 02	180	11	Thos. B. Arden.
Biddeford, Me.....	43 29	70 27	41	2	Jas. G. Garland and F. A. Small.
Bladensburg, Md.....	38 57	76 58	—	1	B. O. Lowmides.
Bloomfield, N. J.....	40 49	74 11	120	12	Robert L. Cook.
Brandon, Vt.....	43 45	73 08	—	12	D. Buckland.
Brooklyn, Mich.....	42 06	83 36	1,020	3	Dr. M. K. Taylor.
Brookville, Pa.....	41 12	79 08	—	6	D. S. Dearing.
Buffalo, N. Y.....	42 50	79 33	606	2	Dr. Sanford B. Hunt.
Buffalo, N. Y.....	42 50	79 33	561	1	W. D. Allen.
Buffalo, N. Y.....	42 50	79 33	—	11	E. O. Salisbury.
Burlington, N. J.....	40 61	74 55	26	12	Rev. Adolph Frost.
Burlington, Vt.....	44 29	73 11	346	12	Prof. Zadock Thompson.
Bustleton, Pa.....	40 65	75 01	—	1	J. C. Martindale.
Byberry, Pa.....	40 06	74 58	—	8	John Comly.
Camden, S. C.....	34 17	80 33	275	12	Thornton Carpenter and J. A. Young.
Canton, N. Y.....	44 38	76 15	304	12	E. W. Johnson.
Carmel, Maine.....	44 47	69 00	175	12	John J. Bell.
Castleton, Vt.....	43 34	73 09	—	12	D. Underwood.
Cedar Keys, Fla.....	29 08	83 03	—	12	Judge Augustus Steele.
Ceres, Pa.....	42 00	78 25	1,440	3	Dr. R. P. Stevens.
Ceresco, Wis.....	43 50	88 57	917	6	Miss Mary E. Baker.
Chapel Hill, N. C.....	35 54	79 17	—	12	Prof. James Phillips.
Chatham, N. Y.....	42 26	73 30	—	5	C. T. Chase.
College Hill, Ohio, (Farmers' College).....	39 10?	84 25?	—	11	Prof. R. S. Bosworth and G. S. Ormsby.
Colonia Tovar, Venezuela, S. A.....	10 26	67 20	6,500	1	A. Fendler.
Columbia, S. C.....	33 57	81 07	—	1	—
Concord, N. H.....	43 12	71 29	374	12	Dr. Wm. Prescott.
Cooper, Mich.....	42 40	85 31	—	6	Mrs. O. C. Walker.
Craftsbury, Vt.....	44 40	72 29	1,100	9	Charles A. J. Marsh.
Crichton's Store, Va.....	37 20?	77 50?	—	12	Lieut. B. F. Astrop.
Culloden, Ga.....	32 51	84 13	825	6	Prof. John Darby.
Danville, Ky.....	37 40	84 31	950	12	O. Beatty.
Detroit, Mich.....	42 24	83 06	620	12	Rev. Geo. Duffield.
Dubuque, Iowa.....	42 29	90 50	550	12	Dr. Asa Horr.
Exeter, N. H.....	42 58	70 55	—	12	Rev. L. W. Leonard.
Fairfax, Vt.....	44 39	72 58	—	1	Prof. S. H. Peabody.
Falconer, N. Y.....	42 05	79 10	—	3	Lawrence A. Langdon.
Fishkill, N. Y.....	41 34	74 18	42	12	William Harkness.

\* For the different names by which in some cases the same place is designated by the observers see the General List of Stations in the introduction.

n Same temperature on the 3d.

o Observations taken at 9 a. m., 2 p. m., and 9 p. m.

p Same temperature on the 25th.

q Observations taken at 7 a. m., 1 p. m., and 9 p. m.

r Same temperature on the 3d and 3d.

s Same temperature on the 17th.

t Observations taken at sunrise and 2 p. m.

u Same temperature on the 21st, 22d, and 26th.

v No observations till the 5th.

w Same temperature on the 14th and 18th.

x Same temperature on the 21st, 24th, and 25th.

y Observations taken at 7 a. m., 1 p. m., and 8 p. m.

a Same temperature on the 13th and 14th.

b Very imperfect.

c Observations taken at sunrise, noon, 3 p. m., sunset, and 10 p. m.

Mean at noon, 66.77; mean at sunset, 63.23.

d Observations taken at sunrise, 2 p. m., and sunset.

e Observations taken at 7 a. m. and 5 p. m.

f Observations taken at 6 a. m., noon, and 6 p. m.

g Same temperature on the 29th.

h Same temperature on the 17th, 18th, and 29th.

i Observations taken at sunrise, 9 a. m., 3 p. m., and 9 p. m. Mean at sunrise, 53.32.

j Observations taken at daybreak and 2 p. m.

k Same temperature on the 30th.

l Same temperature on the 16th.

m Same temperature on the 28th.

n Same temperature on the 27th and 28th.

o Same temperature on the 27th.

p Same temperature on the 20th.

q Observations taken at sunrise, 2 p. m., and 9 p. m.

r For the last 23 days of the month only.

a Observations taken at 6 a. m., 3 p. m., and 8 p. m.

b Observations taken at 9 a. m. and 9 p. m.

c No observations for the first nine days.

d Same temperature on the 28th and 29th.

e Observations taken at sunrise, 7 a. m., 2 and 9 p. m. Mean at sunrise, 54.7.

f Same temperature on the 23d.

g Same temperature on the 30th.

h Same temperature on the 9th.

i Same temperature on the 18th.

j Same temperature on the 1st.

k Observations omitted after the 27th.

l Observations taken at 6 a. m., 2 p. m., and 10 p. m. Incomplete.

m Same temperature on the 29th.

n Same temperature on the 21st.

o Observations taken at 5 a. m., noon, and 7 p. m.

p Observations taken at sunrise, 2 and 9 p. m.

q Same temperature on the 11th.

a Observations taken at 6 a. m., 3 p. m., and 8 p. m.; and humidity calculated from Glaisher's tables.

b These values are computed from the observer's reductions of the same observations as the preceding, but by the use of a different set of tables.

c Same amount on the 25th and 29th.

d Same amount on the 30th.

e Same amount on the 21st, 23d, and 25th.

f Same amount on the 17th, 21st, 23d, and 31st.

g Same amount on the 7th.

a For changes in hours of observation see tables of thermometer for this month.

b For 8 days only, 11th to 18th inclusive.

c Observations omitted from the 5th to the 25th of the month.

d Same height at 9 p. m. on the 31st.

e Same height at 7 a. m. on the 10th.

f Incomplete.

g Not corrected for temperature.

A Same height at 2 p. m. on the 9th.

i Observations taken at 7 a. m. and 6 p. m.

j Same height at 7 a. m. on the 20th.

k Observations taken at sunrise, 9 a. m., 3 p. m., and 9 p. m. Mean at 9 a. m., 29.02. Maximum, 29.33; minimum, 28.68.

l Maximum for the month, 30.38; minimum, 30.02.

m Same height at 2 p. m. on the 31st.

n Observations taken in the morning, 3 p. m., and evening.

a Same height at 2 p. m. on the 14th.

b See notes on thermometer for this month.

c Irregular; no observations before the 9th day.

d Same height at 7 a. m. on the 14th.

e Same height at 9 p. m. on the 14th.

f Not corrected for temperature.

g Same height at 9 and 9 p. m. on the 27th.

h Observations taken at sunrise, 9 a. m., 3 p. m., and 9 p. m. Mean at 9 a. m., 29.01; maximum, 29.55; minimum, 28.06.

i Observations taken in the morning, 3 p. m., and evening.

\* The maxima, being generally 100, or complete saturation, are omitted in this table. For changes in hours of observation, &c, see table of the thermometer for this month.

a These values are derived from the same observations as the preceding, by using the reductions of the observer, which were made by means of a different set of tables.

b Mean force of vapor for the month, .125; mean humidity, 82.

c Same amount on the 14th.

d Same amount on the 15th and 24th.

e Observation taken only at 2 p. m.

f Same amount on the 27th.

g Mean force of vapor for the month, .292, computed approximately from the mean dew point.

h Same amount on the 1st.

a See notes to table of thermometer for this month.

b Observations taken at 9 a. m. and 9 p. m. Not reported from the 26th to the 19th of the month.

c Same height at 9 p. m. on the 28th of the month.

d Same height at 6 a. m. on the 27th.

e Observations interrupted from the 19th to the 28th of the month.

f For the first 26 days of the month only.

g Same height at 7 a. m. on the 2d.

h Same height at 9 p. m. on the 20th.

i Observations taken at 7 a. m. and 6 p. m.

j Same height at 9 p. m. on the 19th.

k Not corrected for temperature.

l Same height at 2 and 9 p. m. on the 27th.

m Same height at 2 p. m. on the 20th.

\* The maxima, being generally 100, or complete saturation, are omitted in this table.

a According to tables used by the observer.

b According to the Smithsonian tables.

c For changes in hours of observation, &amp;c., see table of the thermometer for this month.

d Same amount on the 17th.

e Same amount on the 9th.

f For the last 19 days of the month only.

g Same amount on the 12th.

h Mean force of vapor for the month, .191; computed approximately from the mean dew point.

i Same amount on the 30th.

Same amount on the 2d.

a According to tables used by the observer.

b According to tables of the Smithsonian Institution.

c For changes in hours of observation, &amp;c., see table of the thermometer for this month.

d Mean force of vapor for the month, .576; computed approximately from the mean dew point.

e Same amount on the 2d.

f Same amount on the 7th.

g But few observations during the month.

h For the first 13 days of the month only.

i Mean force of vapor for the month, .869; computed approximately from the mean dew point.

\* The maxima, being generally 100, or complete saturation, are omitted in this table.

a According to tables used by the observer.

b According to tables of the Smithsonian Institution.

c For changes in hours of observation, &amp;c., see table of the thermometer for this month.

d Dalton's hygroscope used.

e Mean force of vapor for the month, .300; computed approximately from the mean dew point.

f Same amount on the 19th.

g For the first 24 days of the month only.

h Observations interrupted from the 16th to the 28th.

i For the first 16 days of the month only.

j Same amount on the 10th.

k Same amount on the 2d.

l Mean force of vapor for the month, .262; computed approximately from the mean dew point.

\* In cases where the observer recorded only the depth of snow as it fell, without melting, it is estimated in this table as equal to one-tenth of that depth in water; and whenever, from this cause or any other, there is reason to doubt the accuracy of the record, it is indicated by affixing a mark of interrogation.

## No. 50.—INCHES OF RAIN AND MELTED SNOW, 1856.

a Register thermometer used.

b Observations somewhat broken in most of the months.

c Hours of observations not uniform throughout the year. See monthly tables.

d Observations, in January, taken at sunrise, noon, and sunset; during the remainder of the year, at sunrise, 2 p. m., and sunset.

e Computed from daily maximum and minimum temperatures.

f Observations interrupted for the first twenty days of June.

g Observations taken at sunrise, noon, and sunset.

h Observations taken at 7 a. m., 1 p. m., and 9 p. m.

i Observations taken at 6 a. m., noon, and 6 p. m., for the first ten months.

j Observations taken at 7 a. m., 1 p. m., and 9 p. m.

k Observations taken at 8 a. m., 2 p. m., and 9 p. m., during the first four months of the year.

l Observations taken at sunrise and 1 p. m.
